Technical Trainer

EduBridge

(School of coding)

Introduction:

Our project explains about the quote book management. This project mainly explains the various actions related to existing and new writer details. This project shows some ease in adding, updating and deleting the writers and admin details.

Our Project Includes:-

- Writers Module
- Admin Module

I have developed this Application in Java, JSP, Servlets and MySQL. It's a web based projects so I have used HTML, CSS also.

The main feature of the project is to manage the records of Writers and Admin also.

In Admin module, I had created Crud Operation where Admin can add New Record, Update, and Delete and also View their whole records.

In Writers module, a Writer can see their own details and also update them.

Software Requirements:

Front end: Java/J2EE technologies (Servlet, JSP), HTML, CSS, JDBC.

Back end: MySQL.

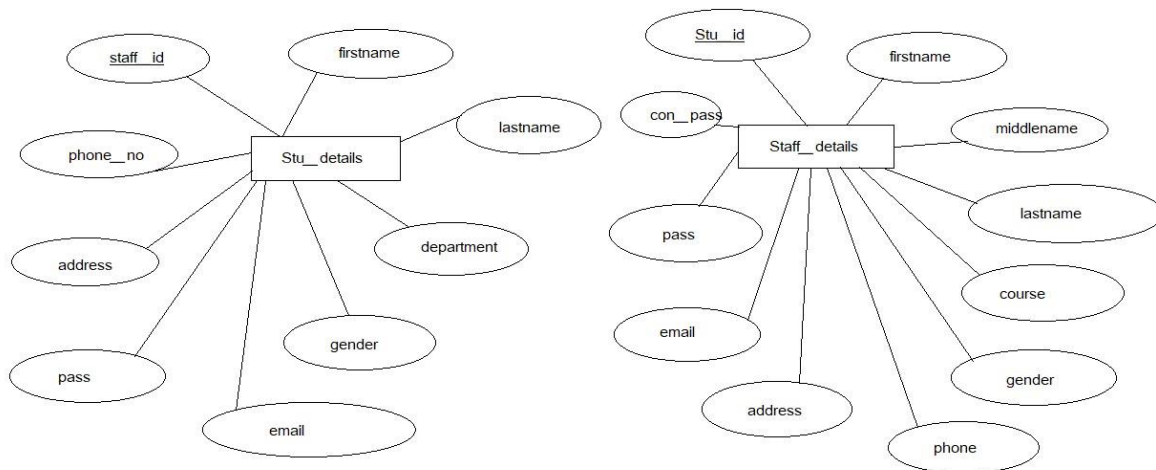

Middleware/Server: Apache Tomcat v7.0.

IDE: Eclipse IDE for Java EE Developers

Browser: Best result on Google Chrome

Operating System: Windows 10.

ERD (Entity Relationship Diagram):

Data Dictionary:

Table name: user

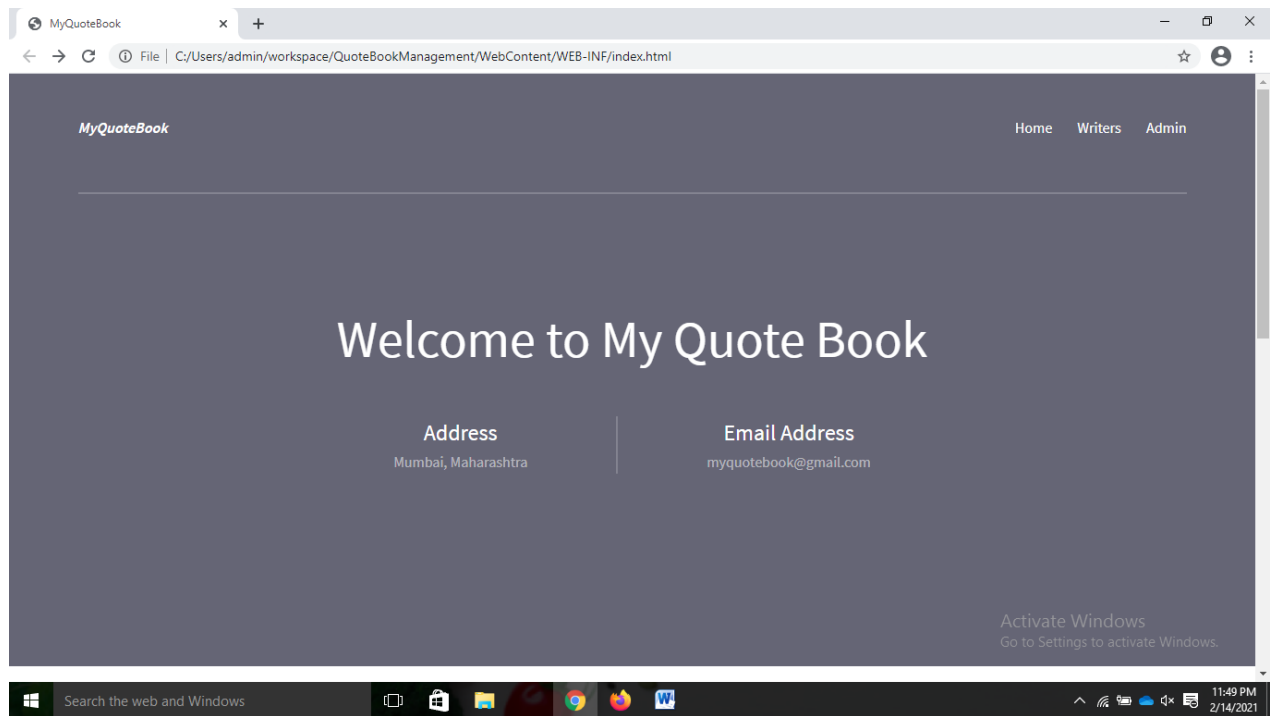

```
create database admin;  
use admin;  
create table user(username varchar(50), pwd varchar(20));
```

Table: writers

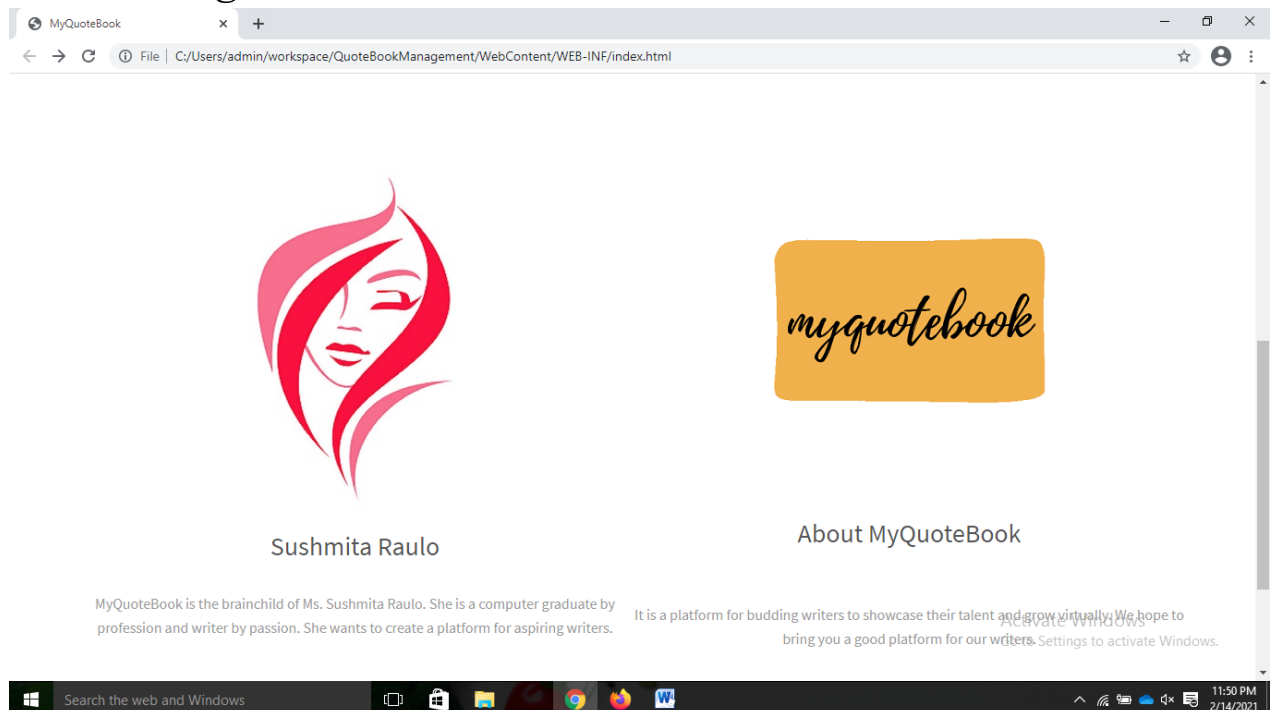

```
create database register;  
  
use register;  
  
create table writers(Id int(5), Firstname varchar(20), Lastname  
varchar(20),  
  
Email varchar(50), username varchar(20), pwd varchar(20));
```
